## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and apparatus for processing images to produce clusters of related objects for subsequent analysis. The closest prior art, Bobrow et al. (USPN 6,562,077 B2), shows a similar system, in which, a document search system initially segments document images into one or more layout objects, wherein each layout object identifies a structural element in a document such as text blocks, graphics, or halftones, subsequently, the document search system computes a set of attributes for each of the identified layout objects. However, Bobrow et al. fail to address: "for deriving segmentation data for an image from a multi-level digital representation which compares differences in background data to determine the segmentation data and combining the data defining the locations of the objects with the segmentation data, clustering the objects into groups for each segmented region and supplying data relating to the groups for subsequent analysis". These distinct features have been added separately to different independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
